Dear Who Profits Research Team,

We received your letter from 26 September 2016 regarding our components being used in a Solar Field called Kalia.

Thank you for making us aware of this.

Padcon is regularly supplying electrical equipment to construction companies in Israel that build photovoltaic projects.

However, due to the nature that Padcon equipment is a commodity equipment, we don't know nor require to ask where this equipment was installed by the Israeli companies. Therefore, Padcon had no way to know that its equipment was used for that project and had not supply any services to this project.

Furthermore, please note that Padcon does not supply inverters but only electrical and software components.

With best regards

Mit freundlichen Grüßen

PADCON **wikiPIDia** NOW ONLINE
